MSc in Centre for Advanced Spatial Analysis, [The Bartlett CASA UCL](#) 24/25
Modelling and Simulation Pathway

HIGHLIGHT

- Proficient experience in geospatial analysis (3+ years)
- Contributed to the development of a novel dataset to support decision making across Government Sectors both Local and Ministry Level
- Executed spatial analysis across Government Sectors and NGO, including healthcare accessibility, site selection, geospatial database, and community development (ArcGIS Pro & Enterprise, ArcMAP, QGIS)
- Enrolled in a data-intensive Master's program, specialising in *Quantative Methods; Data Science for Spatial Systems* (Classification and Forecasting using Scikit-learn) ; *Remotely Sensing Cities and Environment* ; *Urban Simulation* (NetworkX), developing skills in Python, R, and Google Earth Engine.

ANALYTIC PROJECT

- Master's Dissertation (Self-initiated Project)
Using open-access datasets derived from satellite imagery, my research seeks to produce spatially explicit and species-level data that identifies species potentially at risk due to forest loss, aligning with Kunming Montreal Global Biodiversity Framework. This dataset is currently unavailable in Indonesia, offering potential to pioneer biodiversity monitoring in Indonesia and is reproducible for other regions
Achievement: The dissertation was praised by examiners as 'thorough research; encouraging in variety of aspects ; potential to help ecologist & conservationist'
- CASA Urban Simulation Course Project (Merit) : Addressed a business inquiry on selecting new grocery store investment using spatial interaction model under transport cost scenario
- CASA GIS Couse Project (Distinction): Proposed Road intersection upgrade to avoid pedestrian crashes using clustering techniques (DBSCAN, Moran's I) in R Studio

WORK EXPERIENCE

UNICEF & Ministry of National Development and Planning, Indonesia October 2023- May 2024

Geospatial Expert (Project Based)

- Built framework to model healthcare analysis using ESRI Network Analysis & Location Allocation
- Created visual models of healthcare service areas and supported the mapping framework for Indonesia's archipelagic healthcare connectivity

Achievement: provide the first archipelagic region accessibility database across the country to support budgeting and policy implementation

Department of Public Works, Land and Spatial Planning, Province of DKI Jakarta, Indonesia

Senior Professional Staff (Project Based)

March 2023 – August 2024

- Contributed to the development and provision of road and land spatial datasets using ArcGIS Pro & Enterprise
- Enhanced school zoning inclusivity by refining community boundary datasets for DKI Jakarta's education policy.

Achievement: Collaborated with a team to create geospatial datasets that supported the production of detailed 1:1000 urban planning documentation for Jakarta Capital City

Ministry of Agrarian Affairs & Spatial Planning/National Land Agency (Regional Office), Indonesia

Individual Consultant of Agrarian Reform (Project Based)

Mar 2020 – Dec 2021

- Provided spatial inputs to assist the department head in executing national pilot projects on land and community development mainly using ArcMap
- Developed thematic maps to support understanding of site conditions for land consolidation planning.

Achievement: Developed thematic maps for pilot project selection, field-survey preparation, and site profiling, improving stakeholder insight in the agrarian reform initiative

INTEREST & ACTIVITIES

- Student Hackathon CUSP King's College London; February 2025
- Data Visualisation Training, SODA UCL; Liverpool May & June 2025
- Student Volunteer in Computational Urban Planning & Urban Management ; London June 2025
